

Precision, idrodinamicity, low weight, small size, easy to use, high finishing etc..., give the best and affidability quality. The wide screen permit to see an integral vision inside, from any directions.

Technical features	Type of material	body centers and back side from entire block alumin
Recharcable Battery	type NiMh 12 V	
BATTERY CHECK	By LED, changing colour on the basis charge level	
Recharge time	1 hour, with automatic battery charger	
Burn Time	approximately 4 hours	
External video cable connections	EC10 pin / 2 pin, or Nikonos type	
SWITHCHING ON OFF	By ON OFF Camera, without any external push button	
SAFETY	pressurized valve of gas discharge	
Depth rating	130 mt	
Temperature USE	from -20°C to 70°C	
SURFACE Weight	1,05 Kg	
Underwater weight	0,400 Kg	
Size	124 x 91 x 60 mm (out of projecting parts)	
Display	LCD 4:3" 16:9 HD	

TOTALLY AREA VIEW 95 x 55 mm
Video SIGNAL Pal - NTSC
Video-in signal composito 1.0 Vp-p 75R
Resolution 480 X 272 RGB
INSIDE REGULATIONS brightness, contrast, colour, saturation
FIXING SISTEM by Inox joint movable on all positions
